Education

Northwestern University Sep. 2025 – Present

Bachelor of Science in Computer Science *Major GPA: 3.67*

- Relevant Coursework: Data Structures & Algorithms, Intro to Computer Systems, Programming in Systems-Level Languages, Applied Data Management, Computer Game Design and Development, Smart Electronics in Design

Experience

Willie's Wallet Mar. 2026 – Present

Software Engineer | React Native, Expo, TypeScript, FastAPI, Supabase *Evanston, IL*

- Developed end-to-end features and shipped App Store releases for a Northwestern Garage-backed React Native/Expo discount app with 100+ downloads and 20+ partner businesses, spanning mobile UI, payments, and maintenance.
- Implemented Supabase OAuth, JWT verification for a FastAPI REST API, and a RevenueCat subscription paywall for the app.
- Managed the EAS Build and Submit release pipeline through App Store approval.

New Trier Township Food Pantry Jan. 2026 – Jun. 2026

Full-Stack Software Engineer | React.js, Node.js, Express, PostgreSQL, Firebase, Supabase *Winnetka, IL*

- Collaborated with a six-person DISC team to deploy an inventory platform tracking 50,000+ food items, translating weekly client meetings into requirements, Figma designs, and React/Express features.
- Implemented atomic PostgreSQL upserts for scan-in quantities and transactional row locking for checkout.
- Closed an inventory-write authorization bypass for requests without auth headers and enforced active volunteer-session validation on top of Firebase-based admin and volunteer access controls.

Northwestern University Oct. 2025 – Present

Front-End Developer – Web Accessibility | HTML, CSS, JavaScript *Evanston, IL*

- Resolved approximately 500 accessibility issue occurrences identified by Siteimprove across Northwestern websites, rerunning scans to confirm each fix.
- Updated HTML, CSS, and JavaScript to correct link text, image alternatives, iframe titles, and heading structure.

Cargoline Express Jul. 2024 – Aug. 2025

Full-Stack Software Engineer | React, Node.js, MySQL, RESTful APIs *Wood Dale, IL*

- Rebuilt a legacy cargo CRM serving 500+ customers using React, Node.js, MySQL, and RESTful APIs after its QuickBooks integration failed, restoring the workflow used by employees and accountants.
- Automated transfer of CRM data into QuickBooks form fields, replacing employees' manual re-entry of records.

Projects

nuPython | *C* Course Project

- Implemented memory and execution modules in C for nuPython, a course Python-subset interpreter, on top of provided scanner and parser code.
- Implemented variable storage, expression evaluation, type conversions, conditionals, and while loops.

Dendritic Learning | *Swift, Firebase, Apple Vision* Apr. 2024

- Built and released a Swift/Firebase study app to the School App Store with flowchart-style study sets and flashcards; used Apple Vision to recognize handwritten answers and check them against expected responses.
- Won the District 214 App Showcase and presented Dendritic Learning at Apple Michigan Avenue.

Leadership

HSHacks | *Event Organizer* 2023 – 2025

- Co-organized hackathons for 120+ participants, mentored 30+ students, and secured $12K+ from 10+ sponsors.

Technical Skills

Languages: TypeScript, JavaScript, Python, C, C++, SQL, HTML/CSS
Technologies: React, React Native, Next.js, Node.js, Express, FastAPI, PostgreSQL, MySQL, Supabase, Firebase
Developer Tools: Git, Expo EAS Build/Submit, AI-assisted development (Claude Code, Codex)
